The Capital Improvement Budget Process for the City of South Portland

As used in this charter, "capital project" or "project" mean[s] (a) any physical public betterment or improvement and any preliminary studies and surveys relative thereto; (b) the acquisition of property of a permanent nature; (c) the purchase of equipment for any public betterment or improvement when first erected or acquired; (d) the purchase of equipment and vehicles, either the first acquisition or replacement thereof, for use by the various departments of the city.

The City Manager annually presents a seven-year Capital Improvement Plan to the City Council. As part of the Capital Improvement Plan, the City Manager identifies capital projects and proposed new capital projects, the respective appropriations and sources of revenues to fund the projects and the respective amounts, if any, proposed to be raised therefore by the issuance of bonds during the budget year. The City Manager shall also include in the message, or attach thereto, a capital program of proposed capital projects for the 6 fiscal years next succeeding the first year, together with his comments thereon and any estimates of costs.

The City may incur indebtedness by issuing its negotiable bonds, and notes in anticipation of bonds, pursuant to this charter, to finance any capital project which it may lawfully construct or acquire. The city may issue term notes to provide funds for preliminary studies and surveys, including engineering designs and plans, in respect of any proposed capital project, whether or not construction of such capital project shall be fully authorized at the time, and such notes, and any term notes issued as extensions or renewals thereof, shall be issued pursuant to resolution adopted by the affirmative vote of 5 members of the council. Any term notes issued pursuant to the preceding sentence may be paid from the proceeds of negotiable bonds, or notes in anticipation of bonds, issued pursuant to this charter or from other funds of, or available to, the city.

The City Council may authorize the issuance of bonds by a "bond ordinance" passed by the affirmative vote of at least 4 of the members of its council. Each bond ordinance shall be subject to referendum unless the bonds are authorized solely for a capital purpose made necessary as the result of fire, flood or other disaster. Each bond ordinance shall take effect on the 21st day after its first valid publication after final passage, unless it be submitted to referendum, in which event it shall not take effect unless it be approved by the favorable vote of at least a majority of those voting thereon.

Bonds issued after the adoption of this charter shall be made payable in annual, serial and approximately equal installments as pertains to principal, and interest shall be made payable semiannually. Every issue of bonds shall be payable within a fixed term of years which shall in no case exceed 30 years.

Capital Improvement Plan Project Evaluation Guidelines

The following guidelines determine what a CIP project is:

Relatively high monetary value (at least \$10,000)

Long life (at least five years)

Results in creation of a fixed asset, or the revitalization of a fixed asset

Included within the above definition of a Capital project are the following items:

- ❑ Construction of new City facilities
- ❑ Remodeling or expansion of existing facilities
- ❑ Purchase, improvement and development of land
- ❑ Operating equipment and machinery for new or expanded facilities
- ❑ Planning and engineering costs related to specific capital improvements
- ❑ Vehicles and other large equipment
- ❑ Street construction, reconstruction, resurfacing or renovation

Department Heads prepared and submitted capital improvement requests along with detailed project descriptions for first year projects, asset inventory and replacement schedules, supporting studies and strategic planning documents, and seven-year CIP requests.

The Capital Improvement program is based on an extensive prioritization process. Projects are prioritized based on City critical objectives and strategies, the Comprehensive Plan, Project PLAN, special studies and reports, City Council and department priorities, and anticipated funding sources. Projects are then evaluated on the following project prioritization matrix as recommended by the International City Management Association.

1. **Capital Costs** – These represent the annual total costs, including future year capital costs. Also to be considered is whether the proposed project will reduce future capital costs, for example, a rehabilitation project that averts a more expensive, subsequent replacement, and the extent of such savings.
 - a) Lower future capital costs
 - b) High future capital costs
 - c) No impact

2. **Annual Costs** - The expected change in operation and maintenance costs. Operating departments provide year-by-year estimates of the additional costs or reductions likely in the operating budget because of the new project. Also to be considered is changes in revenues, which may be affected by a project, for example, the loss of property taxes incurred when private land is used for a capital project.
 - a) Lower operating costs
 - b) Higher source of revenues

- c) Increases in productivity or opportunity
- d) Higher operating costs
- e) Lower source of revenues
- f) No impact

3. **Health and Safety Effects** – This criterion includes health-related environmental impacts like reductions/increases in traffic accidents, injuries, deaths, sickness due to poor water quality, health hazards due to sewer problems, etc.

- a) Increase public health
- b) Increase public safety
- c) No impact

4. **Community and Citizen Benefits** – Economic impacts such as property values, the future tax base, added jobs, income to citizens, changes in business income, and the stabilization (or revitalization) of neighborhoods. Such impacts may apply more to capital projects related to growth and expansion than to infrastructure maintenance though deteriorating structures can adversely affect business.

- a) Add to tax base
- b) Promote economic development
- c) Create employment
- d) Stabilize or revitalize neighborhood(s)

5. **Environmental, Aesthetic, and Social Effects** - A catch-all criterion for other significant quality-of-life related impacts, this includes community appearance, noise, air and water pollution effects, households displaced, damage to home, effect on commuters, changes in recreational opportunities, etc.

- a) Improve environmental protection effort (clean air, land and water)
- b) Improve quality of life for residents (i.e. noise, light pollution)
- c) Improves community appearance
- d) Improves recreational/cultural opportunities

6. **Distributional Effects** - Estimates of the number and type of persons likely to be affected by the project and nature of the impact – for instance, explicit examination of project impact on various geographical areas; on low-moderate income areas; and on specific target groups. Equity issues are central here – who pays, who benefits.

- a) Significant regional benefit
- b) City wide improvement
- c) Benefits large portion of City
- d) Benefits one neighborhood
- e) Assists in elimination of slum and blight
- f) No impact

7. **Public Perception of Need** - This criterion refers to project assessment of (a) the extent of public support; (b) interest group advocacy and/or opposition.
 - a) Identified in Comprehensive Plan, Project PLAN or other study
 - b) Specific request of the City Council
 - c) Project requested by South Portland neighborhood organization or other group
 - d) Knowledge of public perception of need unknown
 - e) Public opposition

8. **Feasibility of Implementation** – This element is a measure of (a) special implementation problems (e.g., physical or engineering restraints) and (b) compatibility with the general direction of the City.
 - a) Feasibility of implementation is manageable
 - b) Feasibility of implementation presents special implementation challenges
 - c) Project is dependent on the actions of another agency or organization

9. **Implication of Deferring the Project** - Deferring capital projects is tempting for hard-pressed governments, but an estimate of the possible effects, such as higher future costs and inconvenience to the public, provides valuable guidance in proposal assessment
 - a) Deferral of the capital project will significantly increase the cost of the project
 - b) Deferral of the capital project will significantly increase the inconvenience to the public of not completing the project
 - c) Deferral of the capital project will increase operating costs
 - d) Deferral of the capital project will prevent operating cost savings or productivity improvements.

10. **Certainty of Information Supplied** – Amount of uncertainty and risk – For each proposal, each of the above criteria will have associated with it some degree of uncertainty as to cost estimates, effect on service quality, or impact of new procedures. When substantial uncertainties exist regarding any of the evaluation criteria for any proposal, the City should consider estimating, at least in broad terms, the amount of uncertainty – probability of occurrence – and the magnitude of the likely negative consequences. Few cities generate such information, but even “educated guesses” are useful here.
 - a) Certainty of the cost estimate is high based on recent bid document or publicly advertised price
 - b) Certainty of the cost estimate is high based on engineering estimate
 - c) Certainty of the cost estimate is moderately high based on best professional judgement

11. **Effect on Interjurisdictional Relationships** – Possible beneficial/adverse effects on relationships with other jurisdictions or quasi-governmental agencies in the area

constitute this criterion. Such effects, e.g., waste disposal via landfills in other jurisdictions, are likely to require special regional coordination and could impair the proposal's attractiveness.

- a) Interjurisdictional benefit will be achieved
- b) Interjurisdictional project that has the support of another community or agency
- c) Interjurisdictional project that will need to obtain approval from another community or agency

12. **City Critical Objective** – If a capital project directly addresses a City critical objective, the relative attractiveness of that project increases.

- a) Identified in comprehensive Plan, Project PLAN or other study
- b) Specific request of the City Council
- c) Consistent with vision statement “to become the premier service provider in northern New England”
- d) Consistent with annual work plan described in operating budget
- e) Important; but not critical

13. **Nature of the Investment** – Does the capital improvement request replace or maintain an existing asset or provide for a new capital asset?

- a) Maintenance of an existing asset
- b) Replacement of an existing asset
- c) Expansion of an existing asset
- d) New capital asset

14. **Significant Investment in Previous Years.** Has the City made a significant investment in this programmatic area within the last five years?

- a) Significant investment made by the City in the last five years
- b) Significant investment made by the City to meet legal obligation
- c) Moderate investment
- d) No investment

After all proposed projects are prioritized using these fourteen criteria, the list will be reviewed from two more viewpoints: 1) does the list stand an “intuitive check”? Do projects fall in the priority order that was “anticipated”?, and (2) are there any linkages between projects? Are any projects related to each other geographically, or otherwise, such that having them accomplished concurrently would be advantageous? What about sequencing or timing? Are any projects dependent on the completion of other projects? Adjustments to the priority list may be necessary dependent on this final review.

CITY OF SOUTH PORTLAND, MAINE**CITY OF SOUTH PORTLAND, MAINE****General**

The City of South Portland is located on the southern coast of the State of Maine in the southeastern section of the County of Cumberland, the State's most populous county. The land area of the City consists of residential, local business, industrial and coastal land areas with a total area embracing 12.93 square miles, supporting a population of 25,608 residents. A city charter was granted on March 22, 1898 and adopted on December 5, 1898 as the City of South Portland. South Portland is the fourth largest city in Maine and the second largest in its region. Once principally a residential community, the City now enjoys a diversified commercial, industrial and advanced technology aspect to its economy. The City comprises several villages, all being contiguous to another, the major neighborhoods being: Cash Corner, Country Gardens, Ferry Village, Knightville/Millcreek, Ligonias, Loveitt's Field, Meadowbrook, Meetinghouse Hill, Ocean Street, Pleasantdale, Redbank, Stanwood Park, Sunset Park, Thornton Heights and Willard.

The Fore River separates South Portland from the City of Portland for a major portion of its northern border. The remaining portion of the City's northern border is formed by the land portion of the Portland/South Portland line and a portion of the City of Westbrook. South Portland is bordered by the towns of Scarborough at its southwest and Cape Elizabeth at its southeast. The Atlantic Ocean forms South Portland's eastern border as Portland Harbor and Casco Bay. Convenient access to South Portland is provided by Exits 44 and 45 of U.S. Interstate Route 95 (the Maine Turnpike), which diagonally intersects the City's northwestern plain; the U.S. Interstate Route 295 spur, which bisects the City through its western region; U.S. Route 1, which flows through the center of South Portland; State Route 9, which enters the southern section of the City as part of U.S. Route 1 and then departs to the City's northwest; and State Route 77, which intersects the City's eastern plain in a north-south direction, to cross on the Casco Bay Bridge, connecting South Portland and Portland.

The area of which the City is comprised was originally the northern part of the Town of Cape Elizabeth. This area was first settled with a trading station being established in 1627 on Richmond Island. A grant of land on the mainland near the Spurwink River was conveyed in 1631 and in 1632 development of the Spurwink settlements began. The Colonial and native population conflicts forced

abandonment of the area for several lengthy periods from 1675 to 1713. Old Falmouth was incorporated in 1718, forming the area now encompassing the Cities of Portland, South Portland and Westbrook and the Towns of Cape Elizabeth and Falmouth. Due to the inconvenience of crossing the Fore River, Cape Elizabeth (then including the City) became established as the Second Parish of Falmouth in 1733, and on November 1, 1765 separated from Falmouth, being incorporated as the Town of Cape Elizabeth. On March 15, 1895 South Portland divided and set off the northern portion of Cape Elizabeth to become a town.

The City's port area serves as major distribution facility for foreign oil shipments for transmission to Canada as well as refined products for domestic consumption. The Maine Mall in South Portland forms the hub of the largest shopping district in the State. The City is the location for Willard Beach, Bug Light, Spring Point Light, the Southern Maine Community College campus and numerous marinas. Fairchild Semiconductor and Texas Instruments manufacture sophisticated electronic circuits used in personal computers, laptops computers, cellular phones and other devices.

Government

The City operates under a charter initially adopted December 5, 1898, as amended, most recently in November 2009 (the "Charter") providing for a Council-Manager form of government with a seven-member City Council. The Council is composed of seven members, one elected from each of the City's five voting districts, and two members who are elected at-large. The Council members are elected for three-year staggered terms. The Charter grants to the City Council all powers to enact, amend, or repeal rules, ordinances and resolutions relating to the City's property, affairs and government, to preserve the public peace, health and safety, to establish personnel policies and giving effect to any vote of the City and to authorize the issuance of debt subject to referendum approval by the voters of the City. Through its Charter, the Council adopts an annual budget and provides for an annual audit.

The City Manager is the chief executive officer and the head of the administrative branch of the City government.

Municipal Services

The City provides general governmental services for the territory within its boundaries, including police and fire protection, maintenance of highways, streets and sidewalks, parks, recreation, library and coastal areas, sewer service and wastewater treatment. The City also operates a public bus service. Public education is provided under the City's supervision for grades Kindergarten ("K") through 12.

Water service is provided by the Portland Water District, a quasi-municipal entity whose operations and direct obligations are not part of the City.

Planning and Development

The Department of Planning and Development plans for the growth and re-development of the City. Its mission is:

- to maintain the quality of life of a flourishing community in which each resident is reasonably able to achieve his or her highest potential
- to facilitate increased economic activity
- to protect the tax base of the City—upon which depend needed municipal services—by promoting standards attractive to investment
- to protect the natural environment and promote excellence in the design of the built environment
- to provide City decision-makers with quality information and analysis of alternatives
- to promote effective public participation.

Some of the activities of planning staff include:

- Implementing the 2012 Comprehensive Plan Update
- Assisting with implementing the Climate Action Plan
- Fostering economic development
- Writing land use protection ordinances
- Grant writing and community development
- Providing staff services to the Planning Board
- Preparing community-wide plans like the Comprehensive Plan
- Area planning, such as the Mill Creek Master Plan.
- Transportation network and facilities planning
- Review of applications for development projects.

The Department of Planning and Development also includes Engineering Inspection and Code Enforcement. The Engineering section of Planning and Development includes staff and contracted services, providing inspection and limited design and services for the City and its departments. Inspection projects include:

- New developments
- Street openings
- Renovations
- Sewer construction and reconstruction
- Drainage reviews
- Monitoring and enforcing erosion and sediment control activities

The Code Enforcement section of Planning and Development handles zoning, building, plumbing, electrical and street opening permits. The office provides information and services related to:

- Building codes
- Setback requirements
- Permit requirements
- Home occupations
- Accessory Dwelling Units
- Permitted and Special Exception uses
- Zoning districts
- Zoning, wetlands, and shoreland zoning maps
- Variances and other appeals
- Assessor's parcel maps
- Grandfathered buildable lots of record
- City Excavator Licensing requirements
- Property records

The Code Enforcement Office also has information provided by other agencies regarding:

- Radon, Asbestos, and Lead hazards
- Tenant rights
- Adaptive equipment loan programs
- Making homes wheelchair accessible
- Flood Insurance Rate Maps (FIRM)
- Dig Safe

Permits

Most construction projects or installations must have a permit before being started. Before you begin any type of construction project, please call the Code Enforcement Office at 207-767-7603 for information on requirements. Permits are issued from this office for:

- New construction, including buildings, additions, porches, decks, sheds, garages, swimming pools, signs, and more.
- Demolitions
- Changes to existing exterior or interior walls, roofs, window or door openings of buildings, including sign panel changes.
- Temporary structures such as storage and office trailers, and temporary signs and banners.
- Electrical- any service or meter changes and any new wiring, including sign wiring- requires application by a Maine Licensed Master Electrician (even for a single family home)
- Plumbing- any new or relocated fixtures, but not for replacement of old fixtures in the same location. Single family homeowners may take out their own permit. Any other plumbing job requires application by a Maine Licensed Master Plumber
- Heating- any new or replacement heating systems, including furnaces, boilers, woodstoves, pellet stoves, gas heating stoves, and gas heaters of any kind. Gas-fired and oil-burning equipment installations require application by a Maine Licensed Oil Burnerman or Maine Licensed Propane/Natural Gas Technician.

- Fuel tank installations
- Sewer installation or connection/reconnection
- Septic tank installation or replacement
- Sewer impact fees
- Sprinkler systems or other fire or burglar protection systems
- HVAC or installed air conditioning systems (not window units)
- Large tents for special events (proof of treatment for fire retardancy required)

Fences

Fences do not require permits and may be up to six feet in height, placed right against your property line, facing in either direction. Your fence must be behind or against the front property line, not in front of it on what is actually City property between the pavement of the street and the actual front property line.

Building Activity

The following shows the trend of the City's building activity.

FY End June 30,	New Construction	Alterations	Total
1998	\$10,652,540	\$10,429,257	\$21,081,797
1999	\$14,622,169	\$12,014,137	\$26,636,306
2000	\$17,323,039	\$15,056,958	\$32,379,977
2001	\$23,784,876	\$19,976,480	\$43,752,356
2002	\$10,355,145	\$19,416,341	\$29,771,486
2003	\$48,031,348	\$15,035,127	\$63,066,475
2004	\$22,844,810	\$19,821,229	\$42,666,039
2005	\$21,573,491	\$29,977,433	\$51,550,924
2006	\$19,970,163	\$26,685,576	\$46,655,739
2007	\$30,875,553	\$11,974,855	\$42,850,408
2008	\$10,759,460	\$22,129,167	\$32,889,427
2009	\$7,360,574	\$8,554,657	\$15,915,231
2010	\$7,010,044	\$9,407,736	\$16,417,780
2011	\$6,999,202	\$13,068,484	\$20,067,686
2012	\$3,142,022	\$52,431,167	\$55,573,189
2013	\$12,080,787	\$19,830,611	\$31,911,398
2014	\$15,327,221	\$13,712,132	\$29,039,353
2015	\$26,542,177	\$27,237,849	\$53,780,026
2016	\$36,916,595	\$20,135,032	\$57,051,627
2017	\$27,761,099	\$30,696,715	\$58,457,814

Source: City of South Portland

South Portland Fire Department

The South Portland Fire Department provides emergency response services to the community utilizing full-time and part-time on-call firefighter /paramedics. The delivery of Emergency Medical Services is the largest part of our business. We staff two ambulances at the paramedic level as well as three full-time fire trucks staffed with EMS personnel 24 hours a day. The Department serves as a State of Maine sponsored WMD / hazardous materials response team. Administrative offices for Fire, Emergency Medical Services and Emergency Management are located at the South Portland Public Safety building located at 20 Anthoine Street.

The Department currently operates out of three fully staffed stations, Central Station located at 684 Broadway, Cash Corner at 360 Main Street, and Western Ave Station located at 34 James Baka Drive. The three call companies operate out of Willard Square, Cash Corner and Union Street.

The South Portland Fire Department on a daily basis takes an active role in our community to educate the public and prevent emergencies. Prevention is often difficult to measure; however we have seen a remarkable decrease in major fires over the past twenty years. We have moved to automate our inspection program and visit every commercial occupancy and three unit apartment building annually. The Deputy Fire Chief in charge of fire prevention also reviews and approves all new construction plans in the city and makes recommendations on all aspects of the development process.

We focus on several areas in an attempt to prevent injuries and accidents in our community. The first is training of our employees, to be prepared to handle all types of emergencies. The second is through public education within the community. We participate in a regional juvenile fire setter program. Every October as part of fire prevention week the department hosts an open house and safety day at our Central Fire Station.

The South Portland Fire Department has evolved into an Emergency Response Team ready to handle any hazard. Our department has some of the best trained firefighters and paramedics in the state. The outstanding support provided by our community and the dedication of our staff have allowed the South Portland Fire Department to be ranked by ISO (Insurance Services Office) as one of the top departments in New England.

South Portland Police Department

Mission Statement

The mission of the South Portland Police Department is to work cooperatively with and within the community to protect life and property, preserve peace, enforce laws and maintain civil rights through proper and responsive community based service.

School Resource Officer:

A School Resource Officer is a sworn law enforcement officer assigned to a school on a long-term basis. The SRO is specifically trained in and performs three main functions: law enforcement officer, law related counselor and law related educator. The SRO program is a community policing approach in a school environment. The SRO's also participate in school activities and extracurricular events, serve as a classroom resource to teachers in the area of their expertise, are members of the school community and are facilitators of safe and secure school settings.

The South Portland Police Department has one SRO solely dedicated to the South Portland High School.

Triad:

The South Portland Police Department has partnered with the senior members of the community to form the South Portland/Cape Elizabeth TRIAD, an organized program to reduce the criminal victimization of senior citizens. The South Portland/Cape Elizabeth TRIAD meets the first Wednesday of every month (Alternating in South Portland and Cape Elizabeth locations). A Senior Advisory Council also referred to as S.A.L.T. Council (seniors and Law Enforcement Together) act as an advisory group for the police department on crime and security issues involving the elderly. Activities of the S.A.L.T. Council include:

- Educating senior citizens on crime prevention and other social issues that impact senior citizens
- Assist senior citizens with getting resources so they can continue to live independently in their own homes

Citizen Oriented Policing School:

The South Portland Police Department offers an 8-week program that is intended to be an overview of the functions and operations of law enforcement. Citizens from South Portland and surrounding communities are welcome to attend the 8-week, 2 hour, sessions to learn about the following topics:

- The Role of the Police Officer • The Hiring Process • Police Ethics • Juvenile Justice • Community Policing • Dealing with the Mentally Ill • Domestic Violence • Diverse Ethnic Groups • Patrol Procedures • Criminal Investigations • Use of Force

Additionally, participants also have the opportunity to "ride along" with an officer on patrol and participate in scenario-based training. Interested individuals must be 18 years of age and agree to submit to a background check prior to acceptance.

Smokeless Saturday:

The Smokeless Saturday Program is an innovative program designed to provide an educational alternative to the Criminal Justice System for first-time teen offenders of Public Law 470. The Smokeless Saturday Program is the community working together to offer youth an opportunity to rethink their decision to smoke. The program is a coordinated effort of the South Portland Police, the Court System, and the Office of the District Attorney.

If a person under the age of eighteen is found in possession of a tobacco product he/she will be issued a summons to go to court. A letter addressed to the parents of this juvenile will be sent to their home informing them of the summons and of the Smokeless Saturday Program. Parents then may sign up their child for the program, which is held one Saturday per month at the South Portland Police Department. Upon completion of Smokeless Saturday, all participants receive a certificate of attendance. They are also required to complete an evaluation form to help us in assessing the curriculum. Those youth who receive their summons in South Portland, and successfully complete the program, have their summonses dismissed and there is no further court action on that offense. **This program is for first time offenders only; and is a one-time opportunity. Any subsequent summons requires court attendance.** Offenders who have been caught at South Portland schools find their suspension time from school reduced because of their attendance at Smokeless Saturday.

This five-hour class is comprehensive in nature. The program focuses on providing educational material regarding the consequences of tobacco use. Attendees participate in activities that help them understand why they smoke, what their “trigger” situations are and how to avoid them. Participants develop an understanding of what role the media, peer pressure and family tobacco use have in their smoking. Students develop refusal and cessation awareness skills. Finally, goal setting is discussed and emphasized as a way to work toward kicking the habit.

Smokeless Saturday is co-facilitated by Officer Linda Barker and retired Memorial Middle School Health teacher, Madeline Akeley. Linda and Maddie brought the Smokeless Saturday Program to South Portland, and the State of Maine, in 1997. They both have extensive education and training in tobacco cessation specifically and in Addiction Counseling. Additionally, the program relies on volunteers from the health care profession to provide their perspective on the dangers of tobacco use. The Smokeless Saturday Program is not exclusively for those who have been issued summonses. It accepts teens that are referred from other agencies, self or parental referral, along with those referred by community-based organizations such as Opportunity Farm.

Through the efforts of the Smokeless Saturday Program we hope to accomplish several goals. Primarily we want to educate teens about the dangers of tobacco use. In addition, through consistent and strict enforcement of tobacco laws, our goal is to reduce peer pressure on younger children to smoke by older teens, and to reduce teen smoking in local known hangouts. Additionally, strengthened relationships between the police, schools and other community groups will result in consistent, clear messages being delivered to our youth about smoking. Smoking is unhealthy and illegal. Think about it!

To register your child for the Smokeless Saturday or time find out when the next session will be held please call: Officer Linda Barker at 799-5511 x7424. Registration fee: \$30.00.

Community Partnership for Protecting Children (CPPC):

Community Partnerships for Protecting Children (CPPC) is a partnership of parents, neighborhoods, schools, churches, social service providers, children welfare services, law enforcement, neighborhood associations, and businesses working together to support and strengthen families and communities. CPPC is a method of interaction with families that is dependent on parent leadership, agency collaboration, neighborhood presence and adherence to four key elements of best practice, including shared decision making.

The neighborhoods surrounding Brickhill and Redbank were identified early on as a possible site for CPPC. In addition, Youth Alternatives Ingraham was interested in becoming more active with its neighbors. At the same time, there was interest within the City of South Portland to address some of the ongoing needs of the neighborhood including juvenile behavior and school truancy. In November 2008, the City of South Portland organized a neighborhood meeting and a list of issues was discussed, including juvenile behavior, drugs, and the need for greater police presence. In addition, the City formally committed itself to establishing the “Hub” in the Redbank/Brickhill community and secured a location along Westbrook Street to be shared by South Portland Police, DHHS staff and other CPPC partners.

The South Portland Police Department is key partner of CPPC. Their unique role is based on the fact that law enforcement personnel are present in the neighborhood on a regular basis and are often times the first to respond in cases of domestic violence and child abuse. Collaboration and communication between law enforcement and other CPPC partners is essential. On many occasions, responding officers recognize that the family needs help that police are not equipped to provide. Reaching out to the CPPC partners will provide the resources families need and assist law enforcement in effectively addressing the situation.

Parks, Recreation and Waterfront

The mission of the South Portland Parks, Recreation, & Waterfront Department is to provide, maintain and develop recreational facilities, open space and leisure opportunities which will enhance the well being of the citizens of the community. Critical to the success of this mission is our commitment to teamwork that drives excellence at every level of our operation. Our community has a longstanding tradition of supporting thriving programs, diverse green spaces, and publicly accessible trails for all ages to live an active healthy lifestyle. The Department of Parks & Recreation facilitates this tradition through providing the programs citizen’s desire in locations that are second to none in Maine. Any person who rides the Greenbelt on a spring morning, attends a soccer outing at Wainwright Recreation Complex on a fall day, relaxes on a bench in the Mill Creek Park watching children skating on the pond, or plays a leisurely round of golf at our municipal course during a lazy summer evening can tell you that our parks system offers something for everyone. Housed in the South Portland Community Centers on Nelson Road and Redbank participants find a wide variety of activities for all ages year round ranging from water aerobics to the arts on a daily basis.

Public Parks Division

The Parks Division is responsible for maintenance for all City parks, the Municipal Golf Course, City athletic complexes, public school athletic fields, Willard Beach and a variety of other public facilities. During the winter, staff prepares the skating areas as well as cross country ski trails at the Golf Course, Mill Creek Park and Wainwright Recreation Complex, maintains access to the Greenbelt, and assists the Public Works Department in snow operations. Parks Division horticulturist, arborists, and landscaping staff grow many plants including all the annual flowers for the beds throughout the City. The City is also a Tree City USA community so our parks team performs the pruning, planting and removal of City-owned trees. Several annual events to include Art in the Park, Holiday Tree Lighting Festival, Summer Concerts, and Arbor Day festivities.

Recreation Division

Living an active and healthy lifestyle is accessible to everyone through our Greenbelt Trail, Municipal Pool, and variety of programming throughout the City. We offer active recreational opportunities through youth, adult, and senior programming such as pickle ball, soccer, basketball, water aerobics and arts classes at both the South Portland Community Center and Redbank Community Center. You can find our programs listed through the City website where it is also convenient to register on line for programs or classes. We also post many items on our Facebook page so that you can keep up with the latest information. A full listing of all our programs, events, and classes is also published three times a year in our brochure. Our programs are a great way to meet people in the community or to become a volunteer.

Waterfront

The City staff plans, manages, and coordinates maintenance of municipal waterfront facilities, including the Portland Street Pier, Fore River Municipal Boat Ramp as part of Bug Light Park, and Knightville landing in Thomas Knight Park. Spring Point Marina is leased which is operated by Port Harbor Marina but remains under the Department's overall supervision.

In addition, the Cities of Portland and South Portland have worked closely to develop new economic activity in the Port of Portland. At least one general marine cargo terminal with heavy lift capability is located within South Portland. Currently, there are no passenger transportation terminals in South Portland. There are several marinas, a small shipyard, beaches, restaurants, Southern Maine Community College, private homes, condominiums, public park, trails and access points along the South Portland waterfront. Several additional properties along the waterfront are available for commercial development or public use. The diversity of the waterfront's use provides both a great asset and a challenge.

Fore River Municipal Boat Ramp

The Fore River Municipal Boat Ramp is a part Bug Light Park. It is intended primarily for the launching of recreational boats. Commercial boats may use the ramp if such use does not unreasonably interfere with the launching of recreational boats. The public float and landing is generally restricted to the boarding and landing of small craft only. The ramp parking lot and other

adjacent areas are available for overnight or long-term use, as space is available. Advance permission is required by calling 767-7650.

Upon request, the department will provide copies of the current rules and regulations governing the Fore River Municipal Boat Launching Facility.

Portland Street Pier

The City maintains the Portland Street Pier in Ferry Village. The facility has 16 boat slips available on an annual basis to small commercial fishing vessels, typically lobster boats. The pier provides public access for fishing and other family activities. A wood frame building on the pier is leased to Waterworks Diving Services. Commercial fisherman from South Portland interested in obtaining a boat slip may call 767-7650 or write to the Director of Parks, Recreation, & Waterfront, 21 Nelson Road, South Portland, 04106.

Municipal Pier and Public Boat Landing at Thomas Knight Park

Knightville Landing is located in the shadow of the Casco Bay Bridge in Thomas Knight Park. The park is located at the intersection of Waterman Drive and Ocean Street in the Knightville neighborhood. The facility provides a waterborne gateway to the City for recreational boaters. The 300 foot pier and floating docks allow unrestricted access to the water. It is an ideal place to fish, kayak, canoe, or simply sit and enjoy the magnificent view of Portland Harbor's working waterfront.

Fee structure: Fees are paid by visiting boaters. All fees collected are used to operate and maintain this boat landing. **We use the honor system.**

South Portland Public Library

The South Portland Library was constructed at its present location in 1966, and a branch was built in 1976.

As the state of Maine's fourth largest public library, and a leader within Minerva, a statewide cooperative library network, the South Portland Public Library offers extensive collections of materials of all kinds to its users. Beyond items to borrow, the library is also a cornerstone of the community, serving as a gathering place for many cultural, artistic and educational events. We provide access to library services seven days a week, year round, through our two locations, each with its own unique personality.

Highlights of Services:

- Current/Popular Fiction and Non-fiction
- Extensive Collection of Films on DVD
- Audio Books
- Music CDs
- Large Print Books

- Public Use Computers and Printers for Internet, Email and Word Processing
- Photocopiers
- An Amazing Collection of Materials for Children and Young Adults
- Graphic Novels
- Outreach Services – Delivery to the Home Bound
- Story Times, Activities and Groups for Children of All Ages
- Passes to Local Museums and Attractions
- Frequent Concerts, Guest Speakers and Other Special Events
- Adult Book Discussion Groups
- Socrates Café: A Philosophical Discussion Group
- Convenient and Family-Friendly Weekend Hours Search Our Catalog, Check Your Library Account and Request Items 24 Hours A Day At: www.southportlandlibrary.com

Water Resource Protection

The City of South Portland has actively pursued improving water quality in Casco Bay since 1978. The Water Resource Protection Department manages all operations, maintenance, and administrative activities for the wastewater treatment plant, pumping stations, and sewer/storm collection systems to ultimately meet all the water quality requirements set forth by the 1972 Federal Clean Water Act (CWA) through its Maine Pollutant Discharge Elimination System (MEPDES) discharge permit.

The *Treatment Systems Division* is responsible to ensure the treatment plant consistently meets the requirements set forth in the city's discharge permit. A highly successful compliance record is due to the dedication of the staff who work diligently to ensure the plant runs effectively and efficiently at a minimum cost to the residential, commercial, and industrial sewer users. Through a sequence of carefully controlled physical, biological, and chemical processes, the treatment plant staff produces over 2.5 billion gallons of clean water per year. Continuous monitoring and control with the operators' knowledge of biology, chemistry, equipment, maintenance, treatment systems, and processes are critical to peak operating efficiency. The treatment plant can pump and treat an instantaneous peak flow of up to 56 million gallons per day. The treatment plant operators are also responsible for the operations of 30 pumping stations throughout the City. The staff responds to pump station emergencies on a 24 hour, 7 day a week basis. There have been a number of upgrades to the 32 year old treatment facility which have consisted of system replacements to plant process components. This ongoing modernization process insures the City stays in compliance with changing regulations and maintains an efficient low cost system.

The *Collection Systems Division* comprises staff that provides services in the area of sewer/stormwater pipeline inspections, cleaning, maintenance, line repair, and manhole/catchbasin repair and maintenance. They also respond to sewer and stormwater related emergencies 24 hours a day, 7 days a week. The scope of coverage is extensive where the City has over 105 miles of sanitary sewers, 70 miles of storm sewers, and 6,396 structures within the system. These systems require continual service and repair to maintain the collection system in peak operating condition to move the wastewater flows for treatment and minimize the overflows from hydraulically overloaded combined sewer/stormwater collection systems. These combined sewer overflows (CSO's) are regulated discharges that must eventually be eliminated. The City has been actively pursuing this goal

since 1994 and has a master plan to move it to reducing or eliminating the six remaining CSO's over the next *several* years.

Sewer Maintenance provides preventative maintenance and repairs which is critical to keeping the treatment plant, the pump stations, and the department equipment and vehicles running at peak performance. Effective maintenance is a crucial part of operations, not only during the normal flows received on a daily basis, but, most importantly, when the collection and treatment system is tested during storm events, high flows, and natural weather disasters.

The ***Industrial Pretreatment Program*** was established to allow the Publicly Owned Treatment Works (POTW) direct control of industrial user discharges. This program was approved by the EPA in 1983 to insure that the objectives of the federal program were fully implemented on a local level. The program prevents the introduction of pollutants into the POTW, which could cause pass-through or interfere with the operation of the POTW, including interference with its use or disposal of municipal biosolids. The Compliance Administrator regulates the industries through a permitting mechanism to be sure they are in compliance with the program.

The ***Stormwater Management Program*** is the result of recent stormwater regulations and is administrated by the Stormwater Program Coordinator. The duties of this position are far reaching and consist of planning, managing, and coordinating the activities of the City's stormwater program. The program is made up of multiple stormwater minimum control strategies that are required by the federal and state stormwater regulations such as the federal Stormwater Phase II and the Maine Department of Environmental Protections MS4 General Permit for the discharges of stormwater from municipalities. The coordinator will develop and manage watershed plans and pollution reduction programs while working with the City's strategy for bringing urban impaired streams back into their water classification.

The staff can provide guided tours of the treatment plant to groups or individuals to see what treatment plants do for water quality and how the use of technology can improve efficiency and lower cost. The Collection Systems Division can set up demonstrations with local schools to view the latest in equipment and technology utilized in a modern collection system.

The ***Engineering Division*** provides engineering support services that encompass a wide range of needs from construction project management to facility planning and advancing the technological needs of the city. For buildings, roads, sewer construction, stormwater separation, treatment plant, pump station, and other hard construction projects, Engineering can provide the preliminary design work, design management, construction administration, and inspection service to insure the cost effective and product success of construction projects undertaken by the city. Engineering also advances much of the technological and planning improvements the city undertakes such as 3D CAD, CAD standards, sewer/storm systems computer modeling, development and maintenance of GIS data layers, pump station and sewer standards, treatment plant - pump station - collection system facility planning, and accurate efficient compilation and storage of record drawings for city infrastructure that will bring the city into the next generation of cost effective engineering service.

Public Education

The City operates its educational program for grades K through 12 under its own supervision. Article IX of the City's Charter, as amended, provides that the Department of Education for the City be administered by a Board of Education comprised of seven members, one elected from each of the City's five voting districts, and two members who are elected at-large. The Board of Education members are elected for three-year staggered terms. The Board performs all duties and functions in regard to the care and management of the public schools of the City including preparation and submission of its budget to the City Manager, who includes it in the budget process.

Public Works

The Public Works Department provides a full range of services including:

- Automated rubbish collection and disposal
- Snow plowing, sanding and salting
- Street and sidewalk maintenance
- Street paving and reconstruction
- Sign installation and maintenance

Public Works also operates a heavy equipment maintenance facility and the Transfer Station.

Rubbish Removal

One of the Department's primary functions is automated curbside rubbish removal and we collect from approximately 8500 stops weekly. We advertise any postponements of rubbish collection, due to holidays in the Sentry, on SPC-TV (Channel 2 in South Portland), via citywide email and via a maintained community e-mail list. If you would like to be placed on our "community" email list, please email us at publicworks@southportland.org. Any cancellation and/or postponement of rubbish collection due to weather is announced on television Channels 6, 8 & 13, as well as all of the local radio stations.

The Department is also responsible for all road maintenance, which includes, but is not limited to, pothole repairs; rating and coordination of paving and/or overlaying of roads; plow damage repairs (esplanades, lawns, drive aprons, curbing, etc.); signage repair and/or replacement; street sweeping; operation of the City's Transfer Facility; sidewalk repairs (bituminous or concrete); and assist other Departments as necessary.

Other services offered annually include:

- Fall curbside leaf collection, for leaves in biodegradable bags only
- Christmas tree curbside collection for 2 weeks after New Year's Day, weather permitting
- Household Hazardous Waste Drop-off day (City sponsored) - usually the 3rd Saturday in October
- Facility opened four (4) Sundays in the spring and four (4) Sundays in the late fall.

All of these are advertised the same as rubbish is for the holidays. The Department reviews and approves or denies any curb cut applications within the City limits.

South Portland Transportation

Transit Bus Service

The South Portland Bus Service provides a fixed route public transit service to the residents of South Portland. All City buses are lift equipped and wheelchair accessible. The Bus Service has a fleet of buses that operate three routes.

The Mill Creek Transit Hub, located on Thomas & Ocean St, offers riders an indoor facility to sit while waiting to transfer between routes.

The Bus Service also connects with the Portland METRO (774-0351) with a free transfer system to increase service area coverage throughout the Cities of Portland and Westbrook and the Town of Falmouth.

Labor Relations

The City employs full, part-time, permanent part-time (set hours or no set hours), seasonal and temporary employees. The following represents those employees included in a union:

Union	Unit	Effective	Expire
AFSCME (AFL/CIO)	Parks, Public Works	7/1/2012	6/30/2018
SPFCO	Fire Command Officers	7/1/2015	6/30/2018
SPPCSU(MAP)	Police Command Officers	7/1/2014	6/30/2018
IAFF 1476	Dispatch	7/1/2016	6/30/2018
IAFF (AFL/CIO)	Firefighters	7/1/2015	6/30/2018
SPPPA (MAP)	Police Patrolmen	7/1/2014	6/30/2018

The School Department unions consist of the following:

SPAA	School Administrators	7/1/2017	6/30/2020
SPTA (MEA)	School Teachers	9/1/2015	8/31/2018
SPESPA (MEA)	Education Techs, & Clerks	9/1/2016	8/31/2019
SPSEA(MEA)	Maintenance, Transportation & Food Service (As of 4/10/18 being negotiated)	7/1/2014	6/30/2017

Economic Development

The City of South Portland has a diverse economic base, including substantial retail development, manufacturing and industrial businesses, as well as hundreds of small businesses throughout the City. It is home to the Maine Mall, one of the largest retail centers in northern New England. Each year, the Maine Mall and nearby shopping centers draw millions of visitors to South Portland. During the day the City's population swells between 60,000 and 80,000 primarily as a

result of the mall, nearby shopping centers and restaurants, Class A offices, and other prominent businesses.

The City is home to two world-class computer chip manufacturers, Texas Instruments and Fairchild Semiconductor, as well as the Maine headquarters of Anthem Blue Cross Blue Shield and world headquarters of WEX. Hannaford Brothers, a regional grocery store chain has a significant presence with its distribution center and freezer plant, distributing groceries to stores throughout New England. Portland Harbor is a significant asset of the City of South Portland, and it is one of the largest ports on the U.S. East Coast by volume and contributes to the regional economy.

The economic diversity of South Portland has been the key to its success, maintaining a strong economy over the years even during periods when the national economy has receded. South Portland's close-knit and friendly neighborhoods, its amenities, and open green spaces and waterfront are true assets that highlight the community's quality of life. Our City is a treasure and we welcome those who wish to come and visit and see the jewel that we call South Portland.

City of South Portland, Maine
General Fund - Fund Balance Policy
June 20, 2011

Policy Purpose

The purpose of this policy is to establish a target level of fund balance for the general fund and to establish a process and criteria for the continued evaluation of that target level as conditions warrant. This policy shall also establish a process for reaching and/or maintaining the targeted level of fund balance and the priority for the use of resources in excess of the target. Finally, this policy shall provide a mechanism for monitoring and reporting the City's general fund balance. This policy applies only to the general fund.

Definitions and Classifications

Fund Balance is a term used to describe the net assets of governmental funds. It is calculated as the difference between the assets and liabilities reported in a governmental fund.

Governmental fund balance is reported in five classifications that comprise a hierarchy based primarily on the extent to which the City is bound to honor constraints on the specific purposes for which amounts in those funds can be spent. The five classifications of fund balance applicable to the General fund are defined as follows.

Restricted Fund Balance Components:

- *Non-spendable* – resources which cannot be spent because they are either, a) not in spendable form or; b) legally or contractually required to be maintained intact.
- *Restricted* – resources with constraints placed on the use of resources which are either a) externally imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments; or b) imposed by law through constitutional provisions or enabling legislation.

Unrestricted Fund Balance Components:

- *Committed* – resources which are subject to limitations the government imposes upon itself at its highest level of design making (City Council), and that remain binding unless removed in the same manner.
- *Assigned* – resources neither restricted nor committed for which a government has a stated intended use as established by the City Council, or a body or official (management) to which the City Council has delegated the authority to assign amounts for specific purposes.
- *Unassigned* – resources which cannot be properly classified in one of the other four categories. The General Fund should be the only fund that reports a positive unassigned fund balance amount.

Background and Considerations

Fund balance is intended to serve as a measure of financial resources in a governmental fund. The City's management, credit rating agencies, and others monitor the levels of fund balance in the general fund as an important indicator of the City's economic condition. While credit agencies have always analyzed fund balance as part of their evaluation of credit-worthiness, increased attention has been focused on determining sufficient levels because of recent events in the credit markets.

In establishing an appropriate level of fund balance the City has considered the following factors:

- Property Tax Base
- Non-property Tax Revenues
- Debt Profile
- Liquidity
- Budget Management
- Future Uses
- Employment Base

Fund Balance Policy

It is the policy of the City of South Portland to maintain a minimum unassigned fund balance in the general fund of 9% of general fund budgeted expenditures measured on a General Accepted Accounting Principles (GAAP) basis. In the event that the unassigned fund balance drops below this minimum level, the City will develop a plan, implemented through the annual budgetary process, to bring the balance back to the target level over a period of no more than three (3) fiscal years. A super majority vote of five (5) affirmative votes will be required for the City Council to take action on an item that temporarily reduces the fund balance below this minimum target level. In no instance shall the unassigned fund balance in the general fund fall below 6% of general fund revenues for greater than a continuous two (2) fiscal year period.

Amounts in excess of the targeted maximum of 12% of general fund measured on a GAAP basis shall be used for capital improvements or other one-time expenditures as identified by the City Council. By utilizing excess fund balances for capital improvements, the City will reduce the need to incur long-term debt and will avoid creating an operating funding gap for subsequent fiscal years.

This policy has been adopted by the City to recognize the financial importance of a stable and sufficient level of the unassigned fund balance. However, the City Council reserves the right to appropriate funds from the unassigned fund balance for emergencies and other requirements the City Council believes to be in the best interest of the City of South Portland.

Tax Rate Stabilization Reserve

In periods of economic decline where valuation assessments are flat or decreasing, and/or periods of significant estimated revenue loss or periods of high increases in budgeted expenditures, the City Council may set aside funds in the tax rate stabilization reserve to be used to reduce the needs from taxation for the coming year(s). Funds set aside in the tax rate stabilization reserve should have a planned exit strategy to reduce the use of such reserves in subsequent budgets and should be fully funded to the extent necessary to properly provide a declining (tiered) use of this reserve for a period no

greater than 5 years. The objective of this tiered approach is to lessen the impact in subsequent years for the lower estimated revenues from the tax rate stabilization reserve. Upon determining the need to use fund balance to offset the needs from taxation the City Finance Director will provide a recommendation for the funding of the reserve and the City Council will commit the necessary balance to fully fund the reserve in the best interest of the taxpayers.

Committed Balances

The City Council has established various reserves sub funds which are to be treated as committed and are listed in Exhibit A with a brief description of the sub funds intended use.

Assigned Balances

Unless already classified as restricted or committed, the following balances shall be classified as assigned, as per GAAP or as a matter of policy. Additional amounts may be assigned by the City Council and Administration as deemed necessary.

Encumbrances – Amounts encumbered at year-end by contract, including purchase order, or encumbered by some other means shall be classified as assigned.

Budget Appropriation – Amounts appropriated in the annual budget resolve, or in any supplemental budget resolves, for expenditures in ensuing fiscal year shall be classified as assigned.

Additionally the City will have various sub funds which are will be treated as assigned and are listed in Exhibit B with a brief description of the sub funds intended use. City Council action must be taken to establish the types of assignments prior to the fiscal year end but, delegates the Finance Director to determine the proper amounts that are required.

Policy Administration

The Finance Director shall report fund balance in the appropriate classifications and make the appropriate disclosures in the City's financial statements.

Annually, during the Comprehensive Annual Financial Report (CAFR) presentation, the Finance Director shall report the City's fund balance and the classification of the various components in accordance with GAAP and this policy.

Should the City fall below the minimum target level, the Finance Director shall prepare a plan to restore the unassigned fund balance to the target level prior to the ensuing fiscal year's budget adoption.

Should the City exceed the maximum target level, the City Manager shall prepare a recommendation to utilize excess funds for capital improvements or other one-time expenditures.

Capital Improvement Plan

Glossary

Annual Budget – a budget applicable to a single fiscal year.

Appropriation – an authorization granted by City Council to a specified unit of City government to incur obligations and make expenditures of resources.

Assessment - the official valuation of property for purposes of taxation.

Bond – a written promise to pay a specified sum of money (called principal) at a specified date in the future, plus periodic interest at a specified rate. In the budget document these payments are identified as debt service. General Obligation Bonds are debt approved by voter referendum to which the full faith and credit of the City is pledged.

Budget – a plan for the acquisition and allocation of resources to accomplish specified purposes. The term may be used to describe special purpose fiscal plans or parts of a fiscal plan, such as “the budget of the Fire Department,” the Capital Budget” or it may relate to a fiscal plan for an entire jurisdiction, such as “the budget of the City of South Portland.”

Capital – a category of account codes which identify major expenditures of public funds, beyond maintenance and operating costs, for procurement of items such as vehicles, computer equipment, office furniture, and the acquisition or construction of a needed physical facility.

Capital Equipment – fixed assets such as automobiles, typewriters, furniture, technical instruments, etc., which have a life expectancy of more than one year and a value over five hundred dollars.

Capital Improvement Program (CIP) – a document which provides a prioritization and orderly implementation of short and long-range plans for land acquisition and construction of capital projects. It further provides for the scheduling of the associated expenditures over a period of seven years in order to maximize the use of public funds. The first year of the program represents the proposed capital budget for that fiscal year. The schedule is based on a series of priorities which take into consideration the respective projects’ function and urgency. In addition, special consideration is given to the projects’ relation to other improvements and plans, and the City’s current and anticipated financial capacity. The Capital Improvement Program is updated annually, at which time the schedule and the projects are reevaluated, new or deferred projects are added, and the time frame is extended by one additional fiscal year.

Capital Outlays – expenditures which result in the acquisition of or an addition to fixed assets.

Debt – an obligation resulting from the borrowing of money.

Debt Service – the accounting for payments of principal and interest on long-term debt.

Deficit – (1) the excess of the liabilities of a fund over its assets. (2) the excess of expenditures over revenues during an accounting period.

Designated Fund Equity – funds approved and set-aside for a specific defined purpose, by the City Council.

Fiscal Year – in the City of South Portland, the twelve months beginning July 1 and ending the following June 30th.

Fund – a fiscal and accounting entity with a self-balancing set of accounts that are segregated for the purpose of carrying on specific activities or attaining certain objectives in accordance with special regulations, restrictions or limitations.

Fund Balance – the excess of a fund’s assets over its liabilities and reserves.

Generally Accepted Accounting Principles – government accounting and financial reporting is guided by what are referred to as “generally accepted accounting principles” (GAAP) applicable to governmental units. These standards were formulated through the voluntary action of several professional groups and are evaluated and updated by the Government Accounting Standards Board (GASB).

General Fund – accounts for the general operations of the City. This fund accounts for all financial transactions and resources not required to be accounted for in an enterprise fund.

Operating Expenditures – a category of recurring expenses other than salaries and capital equipment costs, which covers expenditures necessary to maintain facilities, collect revenues, provide services and otherwise carry out the City’s goals. Typical line items are supplies, printing, postage, transportation and utilities.

Reserve – an account, which records a portion of the fund, balance which must be segregated for some future use and which is not available for future appropriation or expenditures.

Revenues – funds which the government receives as income. It includes such items as fees from specific services, boarding of prisoners, grants, and interest income.

Surplus – See Fund Balance.

Unappropriated or Undesignated Fund Balance – fund balance at close of fiscal year is not included in the annual budget.
